

BLADERUNNER 45 GT

40 YEARS IN THE MAKING

The Exquisite Bladerunner 45 GT

BLADERUNNER

A true GT, capable of extended highspeed cruising.
Timeless design, where 'Form follows Function'.
Improved efficiency and ride at high cruising speeds in open water.

The Bladerunner 45 GT delivers responsive acceleration and drivability, with the new third generation BR hull providing safe predictable handling and a dry ride, even when presented with challenging conditions.

Capable of 50 + knots, with powering options up to 70 knots for specialist applications.

A practical deck layout, with wide side decks that allow easy walk-around access along the entire length of the boat. Large accessible outdoor spaces for relaxation, sunbathing and swimming.

A light airy cockpit, enhanced by full span electric drop side windows and individually controlled twin air-conditioning units, providing cold or warm air to the Helm and Navigator stations.

Cockpit ergonomics that really work for extended cruising with excellent visibility and protection from the elements.

A well-appointed electronics package and navigational aids to assist with safe passage-making whilst at speed, at night and when encountering poor visibility.

Al fresco dining with stunning sea views of your choice.

STANDARD SPECIFICATION

PRINCIPAL FEATURES

Length overall	13.7m
Beam (Max inc. fenders)	4.2m
Draft (Tc)	0.95m
Displacement (Light conditions)	10,000kg
Displacement (Full load conditions)	12,000kg
Fuel capacity	1,450L
Berths	2 + 2
Speed (Light ships)	50 knots
